	Examiner Anh Q. Tran	Art Unit 2819	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 10 July 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Smith (6,724,278).

Claim 1, Smith shows an arrangement (Fig. 4) for bypassing a low-noise amplifier (LNA 1) in a radio receiver which comprises an antenna filter (60A) between said amplifier and antenna (30), and a bypass path (LNA 2) for said amplifier, the arrangement comprising, at output side of said amplifier (91A), a changeover switch (90) for selecting a signal to be led along the signal path either from said amplifier or from the bypass path, said antenna filter having at least two parallel outputs (68A & 68A') the first of which is coupled direct to an input of said amplifier and the second of which is coupled direct to said bypass path.

Claim 5, Smith shows a second low-noise amplifier (LNA 2) on the bypass path.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2819

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Smith (6,724,278) in view of applicant's Prior Art.

5. Smith discloses the claimed invention except that the changeover switch being implemented by PIN diodes, MEMS, MMIC, or relay instead of a movable switch.

Applicant's Prior Art shows that a switch being implemented by PIN diodes, MEMS, MMIC, or relay is an equivalent structure known in the art (page 1, last paragraph).

Therefore, because these two switches were art-recognized equivalents at the time the invention was made, one of ordinary skill in the art would have found it obvious to substitute PIN diodes, MEMS, MMIC, or relay switch for moveable switch.

Allowable Subject Matter

6. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anh Q. Tran whose telephone number is 571-272-1813. The examiner can normally be reached on M-TH (7:00-5:30) Friday off.
